

**MONTANA FISH, WILDLIFE AND PARKS
NOXIOUS WEED MANAGEMENT
FISCAL YEAR 2015**

Prepared by: Christopher Hagan
Region 2 WMA Maintenance Supervisor/Statewide Weed Coordinator
Fish and Wildlife Division

December 23, 2015

***Montana Fish,
Wildlife & Parks***

EXECUTIVE SUMMARY

This report summarizes weed management expenditures and accomplishments across all three divisions of Montana Fish, Wildlife and Parks (FWP) during Fiscal Year 2015, which includes July 1, 2014 through June 30, 2015.

FWP as a whole owns, leases, and manages, over 500 distinct sites across the state and is responsible for noxious weed management on these sites. The acreages associated within each separate Division are as follows:

- Fisheries are responsible for 16,673 acres in their Fishing Access Sites (FAS's) of which number over 300.
- The Wildlife Division has 429,129 acres that compose its Wildlife Management Areas (WMA's) which there are 83 in number.
- The Parks Division is responsible for 55 State Parks that they manage throughout the state.

In Fiscal Year 2015 (FY15), active integrated weed management activities took place on WMA's and FAS's with neighboring lands benefiting from four primary types of noxious weed control throughout the state.

- Herbicide Application (weed spraying)
- Mechanical Means (this includes but is not limited to mowing, seeding, hand pulling)
- Grazing Management Programs (typically cattle and sheep are used to maintain range health by reducing weed establishment) FWP has grazing leases on 16 of its WMA's.
- Biological Controls (insect releases for specific host weeds and insect collection and monitoring in other areas)

In Fiscal Year 2015, the Wildlife Division expended \$167,336 on WMA's and Fisheries spent another \$137,399 on FAS's for integrated noxious weed control efforts statewide. Not included are other important aspects of weed management including public outreach and education, weed plan preparations, establishing contracts, training, etc. As such, all expenditures are minimum expenditures. Because of the highly invasive nature of noxious weeds, managing them is an ongoing responsibility. Also, costs are continuously rising due to such factors as increases in herbicide and labor costs, inflation, weed resistance to herbicides, and increased efforts to contain noxious weeds.

Through its Fish & Wildlife Divisions, FWP also contributes monies to private landowners through the Block Management Program. These monies are used for weed control on their associated lands. As in past years, these payments are in excess of \$200,000 per year.

Montana State Parks is responsible for 55 park sites across the state of Montana and has spent \$151,675 on the control of noxious weeds on their sites. The Parks Division also conducts educational outreach and hand pulling weed programs along with other supplemental endeavors such as insect releases and mowing.

FWP also works closely with other governmental and non-governmental agencies such as (but not limited to) DNRC, USFS, and County Weed Coordinators along with private contractors and private land owners, to help contain the spread of noxious weeds throughout the state.

Please note that due to fluctuations in property ownership and leasing, the acreage totals being managed may not exactly match the totals of the acreage listed in the following appendices.

CONCLUSIONS

FWP owns and manages less than one-half of one percent off all lands in Montana, yet spends nearly half a million dollars annually, not including staff time, for noxious weed management on FWP owned and managed lands. The Department paid an additional \$200,000 in Block Management Weed Incentive Payments for private land weed control. In Fiscal Year 2015, FWP spent in excess of \$650,000 for “on the ground” noxious weed management.

The dedication of Fish, Wildlife and Parks to manage and control noxious weeds in Montana is evident in its integrated management and contributions to the cause. However, it is the individual efforts of the Department personnel that truly have the “on the ground” impact. Expertise, coordination, and budgets must all come together to continue the Department’s success of noxious weed management¹.

¹The FY15 Noxious Weed Management Report data is prepared by individuals in FWP administrative regions who are responsible for the associated regions noxious weed management. In Region 3, because of personnel leaving the agency in the summer of 2015, Wildlife’s WMA’s data may not be complete. Please also note that the Parks Division has combined Regions 5, 6, and 7 into the “Eastern Region Totals”.

FISH, WILDLIFE AND PARKS FY 2015 WEED MANAGEMENT SUMMARY

SHEET KEY AND TERMS

Weed Species Key			
1 = Spotted Knapweed	7 = Sulfur Cinquefoil	13 = Ox-eye Daisy	19 = Tall Buttercup
2 = Leafy Spurge	8 = Diffuse Knapweed	14 = Dyers Woad	20 = Tamarisk (Saltcedar)
3 = Dalmation Toadflax	9 = Russian Knapweed	15 = Purple Loosestrife	21 = Yellow Starthistle
4 = Canada Thistle	10 = Whitetop	16 = Tansy Ragwort	22 = Common Crupina
5 = Field Bindweed	11 = St. Johnswort	17 = Meadow Hawkweed	23 = Rush Skeletonweed
6 = Houndstongue	12 = Common Tansy	18 = Orange Hawkweed	24 = Yellow Toadflax
			25 = Yellow-Flag Iris
			26 = Eurasian Millfoil
			27 = Perennial Pepperweed
			28 = Hoary Alyssum
			29 = Common Tansy
			30 = Kochia
			31 = Mullein
			32 = Musk Thistle
			33 = Blueweed

Priority Rating Key	
1= High Priority: new or small infestations that can be reduced/eradicated, or a new invader.	*Infestation Status = Increasing(>), Decreasing(<), or Stable(-)
2= Medium Priority: established infestations that may be reduced with continued efforts.	*County Agreement Status = Current(C), or Pending(P)
3= Low priority: large, established infestations where control efforts are limited to containment, suppression, and prevention of new infestations.
